### SECTION: B (5 questions, 10 marks each)

### 51. Read the passage below carefully and then answer in full sentences, the questions that follow.

Napaku is a twelve-year-old girl. She goes to Nzoyiya Primary School in Masaka District. Napaku is a careless girl and that is her problem. She does not complete one activity at a time.

Before she completes washing utensils, you find her playing with friends and then later write her homework. She realizes that she had not completed washing utensils after trying like seven other **different** activities.

It was just a day after Napaku's school had broken up for second term's holiday when a terrible accident occurred at home.

That Saturday, Napaku and everybody else in the family woke up very early to prepare for the day's work. As usual, Napaku was left home to do home chores which included; washing utensils, cleaning the courtyard as well as looking after siblings.

Soon after Napaku's parent left for work, Napaku started washing the dirty utensils. As she was washing, a glass slipped off her hands and it broke into pieces. She got a broom and swept away the broken pieces of glass. Before she successfully swept them away, friends from the neighbourhood <u>invited</u> her to join them in their usual games.

At the peak of their games, they started chasing one another. As they were chasing Napaku, she ran towards her home and she accidentally stepped on the broken pieces of glass she had swept earlier.

Eventually, she started crying for help. Her friends thought that she was tricking them to leave her.

'I warned you to always complete one activity at a time see what has happened to you', Napaku's mother said as she was tying the wound with a clean cloth.

Napaku was taken to Bulamu Clinic for treatment. As she healed, she promised never to play carelessly.
