Solution: S M T W T F S

0 1 2 3 4 5 6

Day + no of days = ..... (finite 7)

$$2 + 38 = \dots (\text{Finite } 7)$$

$$40 \div 7 = 5 \text{ remainder } 5$$

The remainder is 5 so the day will be Friday.

2. If today is Wednesday what day of the week was 47 days ago?

Solution: day - no of days = ..... (Finite 7)

$$3 - 47 = \dots (\text{Finite } 7)$$

$$47 \div 7 = 6 \text{ rem } 5$$

$$3 - 5 = \dots (\text{Finite } 7)$$

$$(3+7) - 5 = \dots (\text{Finite } 7)$$

$10 - 5 = 5$  (finite 7) the day was Friday 47 days ago.

3. It is September now, what month of the year will it be 38 months from now?

Solution: month + no. of months =.... (Finite 12)

$$9 + 38 = \dots \text{ (Finite 12)}$$

$$47 \div 12 = 3 \text{ rem } 11$$

The month of the year will be November
